# Saving the planet one drink at a time

As part of our commitment to sustainability and the environment we are very proud to be working with Sapling Spirits. The worlds first climate positive vodka and gin, made locally in the heart of London. Planting trees for every purchase made.

There are two things that both ourselves and Sapling love, Great tasting spirits and the natural world!

Hiver is an award winning all-British, all natural, honey beer brewer supporting independent Beekeepers in sustaining a healthy British bee population. They share our ethos of treading lightly while producing the highest quality most natural product with the best taste!

Lets drink to that!
